1983 – 928 S model

16v V8 water-cooled engine (front).

Automatic 4 speed (most 928s are automatic)

A/C and Heater works, partially adjustable

Original Aluminum wheels, new tires

Condition – restored in resto-mod style. Looks original, but upgraded where possible for better performance and reliability. New original color paint job with only minor defects. Clean and mostly garaged since 2011. Inspected and driven each year until 2018.

Engine runs exceptionally well, therefore only a top-end rebuild was done

New Leather interior (except for some surfaces not part of the replacement package)

At this time the car is very reliable and could be used as a daily driver if needed, however you will probably prefer to stretch your legs on the weekends!

Upgrades – all documented by spreadsheet

1985/86 exhaust manifolds, 85/86 springs, new Bilstein high performance shocks all around, 3 inch custom Y pipe, Gauge Pod cosmetic upgrades, steering wheel etc. Updated radio (not currently working), new A/C-Heat head unit. Deleted the air pump, re-built the entire wiring harness and replaced key older components (12 pin connector for example) in the engine bay, as well as with the brake system (braided lines etc).

Comments – with 50/50 weight distribution, exceptional engineering and design from Porsche, this car is great fun to drive, own, and be seen in. Very little body roll due to suspension changes.

There were only about 2000 of these made for the US and Canada for the 1983 model year, and it is quite likely you will never see another one, unless you go to a dedicated 928 social gathering. Even so, there is a thriving community supporting these cars, so there is a readily available knowledge base along with help and parts, from 3-4 major suppliers that primarily support just the 928. There are user groups, forums etc. and a couple of 928 only social meets you can attend within a few hours drive. You also can join the Porsche club for more opportunities. The original window sticker is attached below. That of course is quite unusual in itself.

I purchased it in Dec 2010, driven it with care and restored it to its current condition (or by those with proper knowledge). I have the original Window sticker as well as other parts like jacks and lift bars etc. to properly provide maintenance on the car should you feel so motivated. There are also some local shops that can provide some services for the car should anything go wrong. You do not need to go to a Porsche dealer for maintenance or service, in fact it would probably be unusual to find a service department with 928 experience anyway, I have lift bars and jacks (essentials for access underneath and for the Transmission) and a few other odds and ends.

Prices are steadily rising for historical Porsches, and because they are rare, this is a unique opportunity. Feel free to check out the Internet for more information on this model. Prices are all over the place and are unique to each situation. I am selling the car for much less than the amount I have invested which I was well aware of at the time. It is definitely a unique piece of Porsche history for many reasons, but also is still great fun to drive. It is time to pass it on to someone else that will enjoy it.
